

Here are 10 common diseases and their basic treatments/preventive measures:

Disease	Common Symptoms	Basic Treatment / Prevention
Common Cold	Runny nose, sneezing, sore throat	Rest, drink plenty of fluids, inhale steam
Influenza	Fever, body aches, cough, fatigue	Rest, stay hydrated, take medicines as advised by a doctor
Dengue Fever	High fever, headache, muscle and joint pain	Drink plenty of fluids, rest, seek medical attention
Malaria	Fever, chills, sweating, headache	Early diagnosis and prescribed antimalarial medication
Type 2 Diabetes	Frequent urination, excessive thirst, fatigue	Healthy diet, regular exercise, blood sugar management
Hypertension	Often no symptoms, sometimes headache or dizziness	Reduce salt intake, exercise regularly, follow medical advice
Asthma	Shortness of breath, wheezing, chest tightness	Use prescribed inhalers, avoid triggers such as dust and smoke
Peptic Ulcer Disease	Burning stomach pain, bloating, nausea	Avoid irritating foods, take prescribed medications
Pneumonia	Fever, cough, chest pain, difficulty breathing	Medical treatment, rest, adequate hydration
COVID-19	Fever, cough, fatigue, loss of taste or smell	Rest, fluids, follow healthcare provider recommendations

General Health Tips

- Wash your hands regularly.
- Eat a balanced diet rich in fruits and vegetables.
- Exercise regularly.
- Get enough sleep.
- Stay up to date with recommended vaccinations.
- Consult a healthcare professional for persistent or severe symptoms.

Emergency Warning Signs

Seek immediate medical attention if you experience:

- Severe difficulty breathing
- Chest pain
- Loss of consciousness
- Severe bleeding
- Sudden weakness or paralysis
- High fever that does not improve

These are general guidelines and should not replace professional medical advice. Always consult a qualified healthcare provider for diagnosis and treatment.
